

SYLLABUS BOOK

COURSE TITLE:	CERTIFICATE IN PHONICS PROGRAMME
COURSE DURATION:	(THREE MONTHS)
MEDIUM:	ENGLISH
ELIGIBILITY:	10 th PASS
SECTOR:	MONTESSORI TEACHER AND CHILD EDUCATION SECTOR
COUNCIL:	NCVTC EDUCATIONAL TRAINING AND PLACEMENT COUNCIL

COURSE DESCRIPTION: -

The **Certificate in Phonics Programme** is a short-term, skill-based training course designed to equip teachers, parents, and early educators with effective techniques for teaching phonics and early literacy. The course provides a thorough understanding of **phonemic awareness, letter–sound relationships, blending, segmenting, decoding skills, and spelling rules**. Learners are trained to help children develop strong reading and writing foundations using multisensory, interactive, and playful teaching strategies.

This programme focuses on **practical classroom applications**, giving participants hands-on experience with phonics sounds, worksheets, teaching aids, reading cards, and decoding activities. By the end of the course, trainees gain the confidence to teach phonics accurately and support learners with different reading abilities, including early readers and children with reading difficulties.

The Certificate in Phonics Programme prepares educators to create **systematic, child-friendly, and engaging phonics lessons**, enabling children to become fluent, confident readers.

COURSE OBJECTIVES: -

The **Certificate in Phonics Programme** aims to:

1. **Develop strong foundational knowledge** of phonics principles, including phonemes, graphemes, blending, segmenting, and decoding skills.
2. **Equip learners with practical methods** for teaching letter–sound relationships using multisensory and child-friendly techniques.

3. **Enable trainees to design structured phonics lessons** following a systematic and sequential approach appropriate for early learners.
4. **Strengthen the ability to teach reading fluency**, word recognition, spelling patterns, and vocabulary building using phonics-based strategies.
5. **Enhance understanding of phonemic awareness** and its role in early literacy development.
6. **Train educators to identify reading difficulties** and apply supportive phonics interventions for struggling readers.
7. **Prepare learners to create effective phonics materials**, including flashcards, sound cards, worksheets, blending strips, and reading lists.
8. **Promote confidence in facilitating classroom phonics activities**, storytelling with phonetic words, and guided reading sessions.
9. **Encourage the use of assessment tools** to evaluate a child's reading, decoding, and spelling progress.
10. **Build competency in creating a print-rich and phonics-friendly learning environment** that supports early language development.

KEY LEARNING OUTCOMES: -

Upon successful completion of the Certificate in Phonics Programme, learners will be able to:

1. **Identify and pronounce all phonemes** accurately, including consonant sounds, short and long vowel sounds, digraphs, blends, and tricky words.
2. **Apply systematic phonics teaching methods** to help children blend, segment, decode, and spell phonetic words confidently.
3. **Use multisensory techniques** (visual, auditory, kinesthetic activities) to make phonics learning engaging and effective for early learners.
4. **Design age-appropriate phonics lesson plans**, incorporating sound introduction, blending practice, reading drills, and follow-up activities.
5. **Create and use phonics teaching materials**, such as flashcards, phoneme frames, sound trays, blending strips, and reading cards.

6. **Conduct phonemic awareness activities** such as rhyming, syllable identification, beginning/ending sound recognition, and sound manipulation.
7. **Support children in reading fluency**, accuracy, and word recognition using structured phonics-based reading strategies.
8. **Assess children's phonics skills** using diagnostic tools, worksheets, oral reading tasks, and spelling checks.
9. **Identify early signs of reading difficulties**, such as dyslexia indicators, and apply supportive approaches to help struggling learners.
10. **Create a phonics-rich classroom environment** that encourages early literacy, independent reading, and confident communication.

COURSE LESSON MODULE (THEORY)

MODULE 1: Introduction to Phonics

- Meaning and importance of phonics
- Phonics vs. whole language approach
- Stages of early literacy development
- Role of phonics in reading and spelling

MODULE 2: Phonemic Awareness

- What is phonemic awareness?
- Difference between phonemic and phonological awareness
- Skills: rhyming, alliteration, syllables, onset-rime
- Sound isolation, blending, segmenting, and manipulation

MODULE 3: Letter–Sound Relationships

- Alphabet recognition and sound introduction
- Consonant sounds and short vowel sounds

- Long vowel sounds and vowel teams
 - Hard and soft sounds of c & g
 - R-controlled vowels
-

MODULE 4: Blending and Segmenting Techniques

- Strategies for teaching blending (oral & written)
 - Segmenting words into phonemes
 - Introduction to CVC, CVCC, CCVC patterns
 - Word families and onset-rime blending
 - Building decoding fluency
-

MODULE 5: Advanced Phonics Concepts

- Consonant blends and digraphs
 - Diphthongs and vowel digraphs
 - Silent letters
 - Syllable types and syllable division
 - Tricky/exception words
-

MODULE 6: Spelling Rules and Patterns

- Common spelling rules
 - Magic 'e' rule
 - Doubling rule
 - Soft vs. hard consonant spelling patterns
 - Morphology basics (prefixes, suffixes, root words)
-

MODULE 7: Vocabulary & Reading Development

- Building vocabulary through phonics
 - Sight words vs. phonetic words
 - Guided reading strategies
 - Reading fluency techniques
 - Error correction techniques
-

MODULE 8: Planning and Designing Phonics Lessons

- Structure of a phonics lesson
 - Steps for effective sound introduction
 - Use of TLMs and multisensory methods
 - Designing phonics worksheets
 - Creating progressive reading lists
-

MODULE 9: Assessment in Phonics

- Importance of continuous assessment
 - Types of phonics assessments: oral, written, diagnostic
 - Tracking progress through reading and spelling checks
 - Remedial strategies for struggling learners
-

MODULE 10: Creating a Phonics-Friendly Environment

- Arrangement of learning materials
- Print-rich classroom
- Use of storybooks and phonics readers
- Integrating phonics with classroom activities

COURSE TRAINING MODULE (PRACTICAL)

1. Phoneme Pronunciation Practice

- Correct articulation of all 44 English phonemes
 - Practice of consonant sounds, vowel sounds, digraphs, blends
 - Demonstration and repetition exercises
 - Use of mouth formation charts and phoneme videos
-

2. Sound Introduction Demonstration

- Step-by-step presentation of a new sound
 - Use of objects, pictures, flashcards, and multisensory aids
 - Teaching beginning, middle, and ending sounds
 - Conducting sample mini-lessons
-

3. Blending and Segmenting Activities

- Oral blending and phoneme segmentation drills
 - CVC, CVCC, CCVC word building practice
 - Use of blending strips, sound boxes, magnetic letters
 - Speed reading and decoding activities
-

4. Teaching Aids Preparation (TLM)

- Making sound cards, phoneme frames, letter tiles
 - Creating flashcards, word wheels, flip-books
 - Preparing worksheets for sound recognition and blending
 - Designing reading strips and decoding cards
-

5. Multisensory Phonics Techniques

- Sandpaper tracing, rainbow writing, clay letters
 - Air writing, hand actions, kinesthetic activities
 - Sound baskets and tactile learning exercises
 - Interactive group phonics games
-

6. Storytelling and Phonics-Based Reading

- Storytelling using phonetic word stories
 - Guided reading practice
 - Reading aloud sessions for fluency
 - Pronunciation correction and modelling
-

7. Lesson Plan Preparation & Presentation

- Preparing daily phonics lesson plans
 - Presenting complete phonics sessions (introduction–practice–revision–assessment)
 - Peer teaching and feedback
 - Creating teaching schedules for phonics levels
-

8. Phonics Assessment Practice

- Conducting oral sound assessments
 - Reading and spelling assessment tools
 - Word dictation and phoneme identification tests
 - Recording student progress sheets
-

9. Remedial & Supportive Strategies

- Identifying reading difficulties in children

- Conducting remedial phonics sessions
 - Designing customised worksheets for weak learners
 - Use of repetition, reinforcement & scaffolding techniques
-

10. Classroom Environment Setup

- Setting up a phonics corner
 - Displaying sound charts, word walls, reading lists
 - Creating a print-rich, child-friendly environment
 - Organizing materials for easy accessibility
-

11. Micro-Teaching Sessions

- Practice teaching with peers simulating classroom situations
 - Use of structured teaching approaches
 - Handling mixed-level groups
 - Review and improvement based on trainer feedback
-

12. Final Practical Examination

- Demonstration of phonics teaching competency
 - Presentation of TLM portfolio
 - Conducting a full phonics session
 - Evaluation based on clarity, technique, and student engagement
-

THEORY SYLLABUS CONTENTS: -

1. Introduction to Phonics & Literacy Development

- Importance of phonics in early reading

- Phonics vs. whole-language approach
- Stages of literacy

2. Letter–Sound Correspondence & Alphabet Knowledge

- Initial sounds
- Consonant sounds, short & long vowel sounds
- Sound blending concepts

3. Phonemic Awareness & Phonological Skills

- Rhyming, segmentation, alliteration
- Onset–rime blending
- Syllable awareness

4. Digraphs, Blends & Advanced Phonics Rules

- Consonant digraphs (sh, ch, th, wh)
- Vowel digraphs (ai, ee, oa, oo)
- Blends (br, cl, st, pl)
- Magic-e / silent-e rule
- R-controlled vowels

5. Teaching Methodology & Classroom Strategies

- Synthetic phonics approach
- Multi-sensory teaching techniques
- Lesson planning for phonics
- Assessment techniques

PRACTICAL SYLLABUS CONTENTS: -

1. Phonemic Awareness Activities – Practical

- Sound games
- Rhyming drills
- Segmentation & blending activities

2. Letter–Sound Teaching Practice

- Phonics drill sessions
- Flashcards, actions & sound association
- Group reading practice

3. Word Building & Blending – Practical

- CVC word reading
- CCVC/CVCC words
- Digraph & blend word formation
- Reading accuracy practice

4. Teaching Aids & Phonics Material Preparation – Practical

- Flashcards, word wheels, blending strips
- Sound mats, phonics charts
- Low-cost/no-cost phonics aids
